

Data roaming packages

We are introducing several packages with different volume and time duration usage.

Package code	Package MB	Validity (in days)	Price (EUR)
1	10 MB	1	1.00 €
2	50 MB	1	5.00 €
3	150 MB	7	12.50 €
4	250 MB	14	19.00 €
5	500 MB	30	35.00 €
7	Daily AUTO Package 10 MB	1	0.75 €
8	2000 MB	30	95.00 €

Functionality

USSD-commands to manage the service:

*146*941* Package code# - service activation

*146*940* Package code# - service deactivation

*146*942* Package code# - check the status of service

Data packages are available in the following countries and are charged in 100 KB increments:

Austria, Belgium, Bulgaria, China, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Monaco, Netherlands, Norway, Poland, Portugal, Romania, Russia, Slovakia, Slovenia, Spain, Saint-Barthelemy, Sweden and United Kingdom.

Important notices

- Only one package can be activated at once.
- Data package becomes activated as soon as the order through USSD command is made (even in the country not listed above). The package cost is taken immediately.
- The package is completed either when the ordered amount of data is used, or when duration time is reached.
- It is possible to order a new data package when the data amount has been finished, despite the duration time of this package.
- If the amount of data hasn't been used, the client cannot order a new package. To order a new package the current one has to be deactivated with USSD command. In case of deactivation unused amount of data will be lost and money is not refunded.
- Daily AUTO package is activated only when GPRS session is initiated in one of the countries from the list. The package cost is taken from user's balance immediately when Daily AUTO package is activated.
- If customer uses GPRS in one of the countries next day, the Daily AUTO package activates again automatically and the package cost is taken immediately from user's balance.

Please note: At the moment it is impossible to deactivate the Daily AUTO package via USSD (in this case only cost and validity time will be reset), the package will be activated again when new GPRS session is initiated in one of the countries from the list. Daily AUTO package can only be changed to another non auto prolonged data package.
